Red Bull Music Studios

Red Bull Music Studios London

Live Studio

Live Studio

Home to our SSL 4000G & Guzauski-Swist monitors the 500 sq/ft control room is the hub of each room in the complex.

The 600 sq/ft live space can comfortably fit 8 musicians, has natural light and is home to our instrument and amp collection as well as an isolated amp booth.

The Live Studio's vocal booth has clear lines of sight through the control room & live room & has enough space to double up as a small drum booth.
